

WE WANT TO HEAR FROM YOU!

Steele County wants your input on the CSAH 28 and Beaver Lake Park Improvement Project.

Dear Resident/Property Owner,

Steele County is in the final stages of design for the reconstruction of CSAH 28 and combined park improvements for Beaver Lake Park. The design process will last until Spring 2026, with construction starting in Summer 2026.

The County is hosting an open house to discuss the project. The official public comment period for the project is also now open. Community members are invited to review the Environmental Assessment Worksheet (EAW) and share feedback from now until April 2, 2026.

Please visit the [Steele County Project Website](#) for more information about the project process, schedule, and background information. A project display is available to review.

Thank you and we look forward to your feedback.

Sincerely,

Steele County and the Consulting Team
